198004270001	Facility/Infrastructure Attack	82
199111060012	Unarmed Assault	29
198010250004	Unknown	21
198905030009	Hostage Taking (Kidnapping)	20
197406250001	Hostage Taking (Barricade Incident)	7
198803060005	Hijacking	4

Conclusions & Assumptions:

As we can see "private citizens" are the largest victim group of the terror attacks and although Jerusalem is the city with most murdered, Sderot is the most danger city by successful attacks sorted by more than 100.

In my opinion, the most efficient way to depress terror attacks in Israel is to post more security guards and officials at sensitive passage points in all territories A, B, C.

Appointing security services at sensitive passage points will allow a further inspection for hazardous objects such as knives, guns, searching for suspicious objects that may contribute to making hand made bombs and explosives will most likely decrease the high statistics that we can see by the chart above.
